FY24 Behavioral Health Grand Rounds

Sponsored by: Children's National, Division of Psychiatry and Behavioral Sciences and Division of Psychology and Behavioral Health

Chronic disease control and substance use: glimpses of findings from surveillance and intervention research

Carla J. Berg, PhD, MBA, LP

Professor & Associate Chair for Research, Department of Prevention & Community Health, Milken Institute School of Public Health, George Washington University

Associate Center Director for Population Sciences and Policy, George Washington University Cancer Center

Wednesday, September 13, 2023 @ 11:00am – 12:00pm

Abstract

This talk will provide an overview of key socio-structural determinants of chronic disease, prevention and control, particularly in relation to policy/regulations and industry influences related to tobacco and cannabis use and related consequences.

Learning Objectives:

At the end of this workshop, the learner will be able to:

- Describe key socio-structural determinants of chronic disease, prevention and control.
- Identify specific policies/regulations that impact tobacco and/or cannabis use.
- Describe how the tobacco and/or cannabis industry strategies influence individual-level and population-level health

Audience:

Psychiatrists, Psychologists, Neuropsychologists, Child and Adolescent Psychiatry fellows, Psychology Doctoral Interns

Virtual (Zoom)

Carla J. Berg, PhD, MBA is a Professor and Associate Chair for Research in the Department of Prevention and Community Health within George

Washington University's Milken Institute School of Public Health and Associate Center Director for Population Sciences and Policy at the GW Cancer Center. Her research focuses on multilevel determinants of health behavior. In particular, her research examines tobacco and cannabis use in the context of related policies and marketing influences; policy adoption, implementation and evaluation; and developing and testing scalable behavioral interventions to reduce chronic disease risk and burden.
